CYBERSECURITY

Passionate web developer with 1 year of experience as freelancer. Eager to join a company to start working with a competent team as passionate as me to design and develop as best as we can, and also to solve any problem that comes our way. As a freelancer I helped people around the world to re-design his website and fix small design or code mistakes remotely. Also as personal projects to train I built multiple websites from scratch with responsive design & clean code and took different courses to improve my design and coding skills to not just stick what i've learnt during studies & master technologies as best as I could.

Im looking to join a company to stop working as a freelancer and start building things with a team and start new projects.

EXPERIENCE

- 2021 - 2022

FULL STACK WEB DEVELOPER at VILAX (internship)
 - Managed more than 20+ companies websites & hostings, mostly Wordpress + Elementor + Woocommerce stack & developed some plugins to interact with Wordpress & Woocommerce core files. Also did small tasks on all those websites such as changing hostings, setting up new Wordpress installations, SSL configurations and fixing all type of issues related to those technologies.
- 2020 - 2019

FREELANCE WEB DEVELOPER
 - Solved tasks for particular people or companies, those tasks involved fixing mistakes on a existing website, fixing bad implemented code and added new sites, designs, sections and re-writed code that could have been improved.
 - Collaborated with the client to fill his needs and to be able to work remotely with him as fast & professional as possible and fitting the time-change of another countries as best as I could to be the most efficient as possible.
 - Worked as an independent developer for the entire time that I've been working as freelancer, learnt how to manage work-time efficiently, complete deadlines in time & helped to re-design, fix and optimize my client's websites as best and professionally as I could.
